PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in Python, ETQ Reliance, and SQL optimization, specializing in QMS automation and backend development. Experienced in designing scalable applications, optimizing SQL queries, and delivering QMS solutions in Agile environments. Proficient in Python and ETQ scripting, with hands-on experience in Django and API development and Strong problem-solving abilities.

EXPERIENCE

Software Product Specialist

Jan 2024 – Present

Kernshell Technology Private Limited, Ahmedabad, Gujarat

- Designed, developed, and customized applications on the ETQ Reliance platform to meet Quality Management System (QMS) requirements.
- Configured ETQ modules, views, forms, workflows, and user permissions to support end-to-end QMS processes across cross-functional teams.
- Developed and optimized complex SQL queries for data validation, reporting, and troubleshooting, reducing query execution time and enhancing system performance.
- Led ETQ Reliance system upgrade project, analyzing existing configurations and resolving compatibility issues to align with the latest version while maintaining business continuity.
- Developed and implemented ETQ scripts using Javadocs methods and Python to customize workflows and improve system functionality.
- Developed ETQ scripts in the ETQ Reliance environment to automate document extraction, implement criteria-based filtering, and generate metadata for files stored on SFTP servers.
- Developed Functional Configuration Specifications (FCS) and design documentation in the ETQ Reliance environment, detailing system configurations, workflow designs, and business requirements to support implementation and validation.
- Collaborated with cross-functional teams in an Agile development environment to deliver scalable and compliant ETQ solutions.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, JavaScript

Web Technologies: HTML5, CSS3, Bootstrap 4

Frameworks & Platforms: Django (3.1), ETQ Reliance Platform

Databases: MySQL, SQLite3

Development Tools: Git, PyCharm, Visual Studio Code, Chrome Developer Tools

Specializations: ETQ Reliance Configuration, Django ORM

KEY PROJECTS

Document Extraction and Storage on SFTP Server

- Developed an automated document extraction system using ETQ (Script) and Python by matching field values across modules to identify and process relevant documents.
- Implemented criteria-based filtering (Product, Formula Code, etc.) to handle reusable and non-reusable document workflows.
- Built an attachment processing pipeline with file validation, duplicate handling, and filename standardization.
- Automated secure file transfer to a client SFTP server with structured directory creation, JSON metadata generation, and ZIP archiving.

System Upgrade (OLD to New Version)

- Conducted impact assessment across multiple modules to identify required changes for system upgrade.
- Upgraded the test environment (Old System) to the development environment of the new system.
- Implemented UI fixes to improve user experience and system functionality.
- Reviewed and resolved client-reported issues from the issue log, ensuring smooth system performance.

Biryani Ordering Application — Django, SQLite3, Bootstrap [github.com/ankita-world/Biryani Ordering System](https://github.com/ankita-world/Biryani-Ordering-System)

- Built full-stack web application using Django framework with CRUD operations, allowing users to explore biryani varieties and contribute new entries to the database.
- Implemented Django ORM for database interactions and responsive UI using Bootstrap4, handling user authentication and form validations.

Employee Information Management System — Django, SQLite3, HTML/CSS github.com/ankita-world/Employee-Information

- Developed secure employee data management system with role-based access control, enabling managers to view and manage employee records.
- Designed RESTful APIs with Django for CRUD operations and implemented responsive frontend using HTML5, CSS3, and Bootstrap4.

Bank Operations System — Python github.com/ankita-world/Bank-Operation

- Developed a banking application supporting account creation, deposits, withdrawals, and balance inquiries.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Graduated 2022 | Ayodhya, Uttar Pradesh

CERTIFICATIONS & TRAINING

Embedded Systems and PCB Designing – SOFTPRO INDIA Pvt. Ltd. (Jul 2019 – Sep 2019)

Python, OOP Concepts – DOAFCO (May 2020)
